## OUR COMMITMENT

Anvil Investments Limited operates with integrity and fairness. Upholding high ethical and compliant standards is essential to our success. We are dedicated to preventing the use of forced and child labour in both our operations and supply chains. To address this, we continue to devise strategies and implement measures to mitigate these risks. This report has been prepared in accordance with the *Fighting Against Forced Labour and Child Labour in Supply Chains Act* (Canada) (the “Act”). We remain committed to identifying and mitigating any forced labour risks in our operations and supply chains and take seriously our part in this important fight.

## STRUCTURE AND ACTIVITIES

Anvil Investments Limited (“Anvil”) is a privately held holding company that has a controlling ownership interest in Price Industries Limited (“Price”), E.H. Price Solutions L.P. (“E. H. Price Solutions”), SolutionAir Limited (“SolutionAir”) and APEL Extrusions Limited (“APEL”).

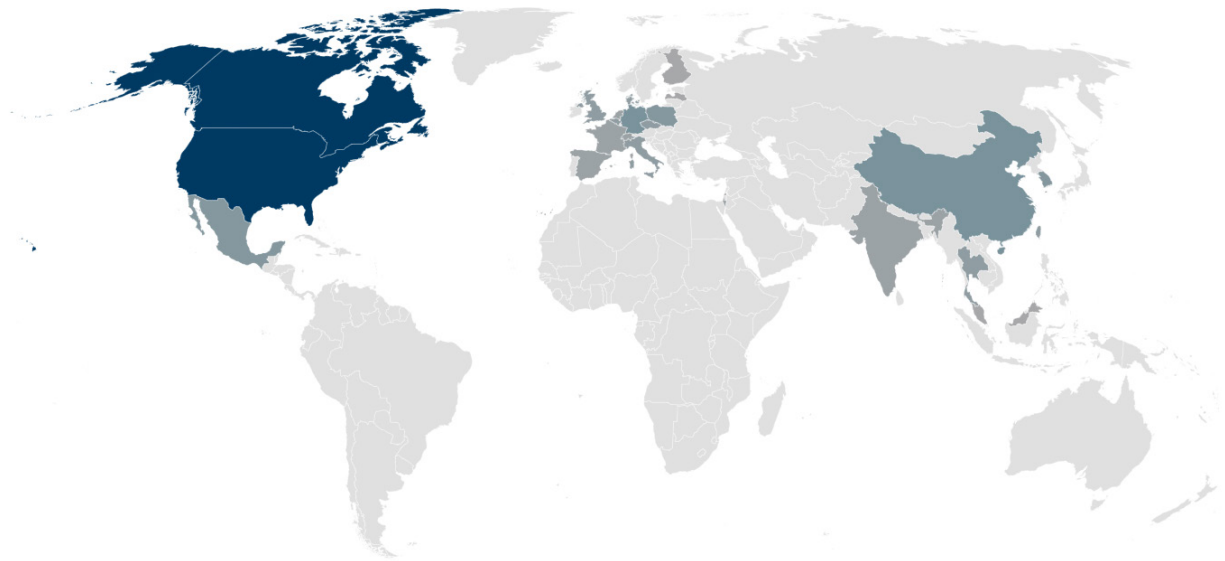

Price is a market leader in commercial HVAC manufacturing in Canada. For more than 75 years, Price has served Canadian and International markets with a wide array of HVAC products, superior customer service and continual innovation. Established in 1949 and headquartered in Winnipeg, MB, Price is a manufacturer of commercial air distribution products. Price’s product range encompasses commercial air distribution, critical environment and control systems, electronics, and mechanical HVAC equipment. In 2025, Price employed approximately 2,045 people in Canada across four manufacturing facilities and a national sales network. Price has an affiliated company in the United States, Price Industries, Inc. (“Price US”), which has manufacturing facilities in the United States. The data in this report relates to the Canadian company.

E.H. Price Solutions is the result of a strategic partnership between E.H. Price (the former sales division of Price) and Enviroair Industries Inc. effective June 1, 2025. E.H. Price Solutions supports the design and delivery of complete HVAC systems for industrial, commercial, and institutional applications by offering comprehensive product portfolios in the market. E.H Price Solutions employed approximately 350 people in 2025.

SolutionAir delivers customized air-handling, heating, cooling, and energy-recovery systems for a broad spectrum of commercial, institutional, industrial, and public-sector clients. Its project portfolio spans manufacturing facilities, laboratories, warehouses, and community organizations across Canada and the United States. In 2025, SolutionAir employed approximately 300 people.

APEL was established in 1972 and is headquartered in Calgary, AB. APEL is a leading Canadian manufacturer of aluminum extrusion and aluminum extrusion related products, serving the building and construction, transportation, electrical, solar, and various other industries with extruded aluminum products. APEL’s other services include painting, anodizing and other machining. APEL’s Canadian operations are centralized in one manufacturing facility, which employed approximately 139 employees in 2025.

# SUPPLY CHAIN

## Overview

Price, E.H. Price Solutions, SolutionAir and APEL have taken steps to map the Tier 1 Suppliers and the country of origin for goods they procure in Canada or import into Canada. Price, E.H. Price Solutions, SolutionAir and APEL Tier 1 Suppliers are predominantly located in Canada and the United States, with select suppliers located in Asia, Mexico and Europe. For the purposes of this report, the term “Tier 1 Suppliers” refers to suppliers Price, E.H. Price Solutions, SolutionAir and APEL did direct business with during 2025.

## Supply

### Price

Price’s total annual procurement spend was largely with Canadian and US suppliers. The significant majority of total annual procurement spend was with Canadian and US Tier 1 Suppliers, with a small minority with suppliers in Europe and Asia.

### E.H. Price Solutions

E.H. Price Solutions is an HVAC sales organization focused on supplying the Canadian market with predominantly North American sourced products. The company maintains strong vendor relationships and in-depth product expertise, with only a limited portion of its sourcing originating from suppliers in Asia and Europe.

### SolutionAir

SolutionAir sourced manufacturing materials from Canadian and US based Tier 1 suppliers for its 2025 operations and continues to prioritize a localized North American supply chain to best serve its customers.

### APEL

APEL’s direct supply chain is characterized by relatively low risk due to a small set of core suppliers that are predominantly located in North America. The nature of APEL’s business requires a low variety of input products, allowing for strong vendor relationships. In 2025, APEL’s major Tier 1 Suppliers or distributors of raw materials were located in either Canada or the United States.

### Tier 1 Suppliers Spend by Region

In 2025, Price, E.H. Price Solutions, SolutionAir and APEL’s Tier 1 Suppliers were primarily located in Canada and the United States.

## **POLICIES AND DUE DILIGENCE PROCESSES**

Price, E.H. Price Solutions, SolutionAir and APEL are committed to conducting business in a manner that upholds high ethical standards and promotes sustainability throughout their supply chains. This commitment is embedded into the Supplier Code of Conduct's adopted by the businesses and Terms and Conditions applicable to Price's and SolutionAir's manufacturing purchases. APEL currently adheres to the Price Supplier Code of Conduct.

The Supplier Code of Conduct can be found using the link below:

- [Price Industries Limited](#)
- [E.H. Price Solutions](#)
- [SolutionAir](#)

The Price, E.H. Price Solutions, SolutionAir and APEL Supplier Code of Conduct highlights the expectations placed on suppliers, including specific clauses on freely chosen employment, child labour avoidance, working hours, wages and benefits, nondiscrimination and freedom of association, and collective bargaining. This code of conduct is distributed annually to Tier 1 Suppliers.

APEL's supplier relationships and contacts are directly overseen by the President of the company, and any issues that arise are addressed at the highest organizational level. This level of oversight ensures any noncompliance within the Supplier Code of Conduct may be promptly addressed by the APEL executive team. This is possible due to the small number of legacy suppliers APEL conducts business with each year.

### **Tracking Implementation and Results**

Price, E.H. Price Solutions, SolutionAir and APEL have established metrics to gauge the effectiveness of their policies and due diligence processes. These metrics encompass various indicators, such as the number of supplier risk assessments completed, the number of identified incidents and corrective actions taken. The businesses solicit a supplier self-assessment questionnaire. Price, E.H. Price Solutions, and SolutionAir also solicit product country of origin from Tier 1 Suppliers annually. This assessment, along with periodic supplier audits, is used to assess risk and compliance throughout the supply chain.

## FORCED LABOUR AND CHILD LABOUR RISKS

We continue to evolve and have implemented a comprehensive approach to assess the potential impact of our activities and supply chains on the actual or potential risk of forced labour or child labour. We have conducted assessments of our supply chains, examining the stages from material sourcing to final production in Canada, to identify any areas of concern where such risks may exist. We have actively engaged with our suppliers to ensure their adherence to ethical labour practices and to promote transparency throughout our supply chain. While we acknowledge that the risk may heighten as we delve deeper into the lower tiers of our supply chain, we remain committed to the implementation of risk-mitigation protocols to address any identified concerns.

Furthermore, Price, E.H. Price Solutions, SolutionAir and APEL have implemented systems for regular monitoring of and reporting on forced labour risk and identification.

## REMEDIATION MEASURES

Price, E.H. Price Solutions, SolutionAir and APEL are not aware of any instances of forced labour or child labour in our operations or supply chain thus far. Accordingly, no remediation measures have taken place.

## LOSS OF INCOME

Price, E.H. Price Solutions, SolutionAir and APEL are not aware of any instances of forced labour or child labour in our operations or supply chain thus far. Accordingly, no measures to remediate the loss of income have taken place.

## TRAINING

Price, E.H. Price Solutions, SolutionAir and APEL are committed to the continuation of education and awareness on the topic of forced and child labour in global supply chains. Training is mandatory for key members of the supply chain and corporate compliance teams and is made available for other employees.

Our 2025 forced labour and child labour training utilized both internal and external resources. Training, hosted by various compliance organizations, was attended by members of the corporate compliance team. Information learned was shared among the corporate compliance, legal, supply chain and logistics teams to collaborate on the development and maintenance of internal policies and procedures.

## ASSESSING EFFECTIVENESS

### How We Assess Our Effectiveness in Ensuring Forced and Child Labour Are Not Used in Our Business and Supply Chains

Price, E.H. Price Solutions, SolutionAir and APEL assess their effectiveness in ensuring that forced labour and child labour are not being used in their businesses and supply chains through several methods depending on perceived supplier risk, including, but not limited to the following:

- Periodic risk assessments and audits;
- In-person supplier visits;
- Monitoring and reporting mechanisms available to internal and external stakeholders;
- Supplier engagement and collaboration (quarterly business reviews); and
- Documentation and record-keeping (database management).

All businesses conduct an annual survey of their partners, and responses are reviewed for red flags and supply chain risks. If issues or concerns are uncovered, they are promptly escalated to leadership.

### Policies and Procedures for Tracking Effectiveness

Our trade compliance policies and Code of Conduct practices, in conjunction with a dedicated compliance team to measure and track effectiveness, assist in mitigating and/or preventing the use of forced labour and child labour.
